Forecast for Wednesday 02 Dec 2020

Weather: Clear or sunny intervals and occasional showers of snow or hail, some of the showers will be heavy with a risk of thunder in the west. The Angus hills and ranges over Deeside may see few showers with plenty of sunshine.

Chance of cloud free mountain/hill tops above 800m: 30% in southwest, 70% in northeast. Cloud lowering to 600 metres in showers, this may well be quite frequent across the southwest of the region as showers run through. Best of the cloud free summits across Deeside.

Visibility: Occasionally very poor in snow showers, mainly in southwest. Excellent visibility outside of showers and cloud and for longer periods over Deeside.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Be prepared for some poor winter weather even at modest altitudes, especially in the west, with the freezing level lowering further in the afternoon.

Forecast for Thursday 03 Dec 2020
Weather: Occasional snow showers at first in the west of the area, these dying out through the morning. Otherwise it will be dry with some sunshine, best of the sunshine in the northeast. Chance that low cloud may become persistent across the south of the area in the afternoon.

Maximum wind: Southeasterly 15 mph

Chance of cloud free mountain/hill tops above 800m: Cloud lowering to 600 metres in snow showers, and may well be persistent across the south of the area in the afternoon, low confidence in this aspect. Best chance of cloud free tops most likely across Deeside.

Visibility: Poor in any snow, otherwise generally good

Temperature: **Glens:** Minus 3 rising to plus 3 Celsius
At 800m: Minus 3 Celsius
Freezing level: 400 metres
